- Taught and brought new QA apprentices up to speed with QA/Development processes at Wazoku
- Createed test plans in preperation of sprint and company-wide regression tests
- Took onwership and created first iteration of the automation suite
- Run weekly company-wide regression tests

Projects:

- **Designed and implemented an E2E testing suite that used Page Object Models to increase readability and reuseable code**
  Technologies: Python, Javascript, Selenium, Appium, Android SDK, Pytest, Jenkins, Java
- **Created a scrpt that will randomise test scripts to reduce that number of times a tester would recieve that same user case to test**
  Technologies: Python

Side Projects

Mobile App
General Tasks:

- Architected and designed app
- Created Documentation

Toolchain: Python, React Native, Typescript, Ava, Java, GIMP, PyTest, Django

Languages

English: Native
Portuguese: Fluent

Technical Skills

Programming Languages

Backend

- Python

Frontend

- Javascript, JQuery and Typescript
- CSS (SCSS)
- HTML

Frameworks, Libraries and APIs

- Django
- Pyramid
- AngularJS 1.x
- React
- React Native
- Marshmallow

Testing Frameworks and Libraries

- PyTest
- Ava
- Selenium
- Jasmine
- Karma

OS

- Windows (XP, 8.x, 10)
- Linux (Ubuntu, Void, Alpine)
- FreeBSD

Bug Tracking Systems

- FogBugz
- GitHub
- Trello
- Team Services

Version Control System

Distributed

- Git

Databases

Relational

- PostgreSQL

NoSQL

- CouchDB

Search

- Solr
- ElasticSearch
